

Quick Installation Guide

1. Tools Required

The following tools will be required to install CM(Master module) and CS(Slave module).

2. Packing List

For CS :

No.	Items
A	Mounting screw pack
B	Installation guide & User manual

For CM :

For CM4000(US only):

No.	Items	No.	Items
C	Mounting screw pack	J	Expansion tube*2 & Expansion screw*2
D	Fixing bracket	K	Waterproof cover
E	Footstand	L	RJ45
F	Communication cable (BMS-inverter)	M	Junction box (US only)
G	Grounding cable	N	PLUG *2 (US only)
H	DC output cable	O	Grounding cable (US only)
I	Installation guide & User manual	P	DC output cable (US only)

3. Terminals

For CM :

4. Installation Steps

Step 1

Install a CS with four footstand (Item E) and place it on the ground and adjust it to the level. After installing the footstand, use a track level bar to confirm the level. Insert the waterproof cover (Item K) into the bottom of the battery and lock it in place with the clip.

Step 2

Place the battery 20mm against the wall. Note: Please make sure the Operating Status LED is on your left handside when you facing the battery model.

Step 3

Stack the batteries one by one.

Step 4

Place the two fixing brackets (Item D) close to the wall and install them on both sides of the battery.

Step 5

Mark the wall through the bracket hole.

Step 6

Punch after removing the CM. Drill holes with electric drill, make sure the holes are at least 50mm deep, and then tighten the expansion tubes (Item J).

Step 7

After stacking CM again, fix the battery on the wall.

Step 8

Fix the mounting screw packs on both sides of the battery, the installation is over.

Note: Please make sure each system including 1 CM and 1 CS.CS less than 6(1~6) pieces:

For CM 4000 (US only):

Note: Please make sure each system including 1 CM and 1 CS.CS less than 4(1~4) pieces:

Please refer to the video for the installation of the junction box and the cable gland.

For CM 4000 (US only):

5. Wiring Steps

A: Connect the inverter and make sure the wiring position is correct, as shown in the figure below.

Note: Inverter wiring refer to the inverter user manual.

For outdoor use, please use item L and proceed as follows

Connection steps:

Step 1: Prepare a standard network cable and cable connector, then insert the network cable through the cable connector.

Step 2: Crimp the cable with a RJ45 plug which is inside of the cable connector.

If the usage is indoor, please use item F

Step 3: Insert the cable connector into BMS port at the bottom of inverter and screw it tightly.

B: Connect the grounding cable. The figure is shown in below.

6. System Start up

CM operation:

- Normal mode: When there is PV and grid access, turn on DC switch first, then press "POWER" button.
- Black start: When there is no PV and grid access, turn on DC switch first, then press "POWER" button, then press and hold "B-Start" button and release it after 10s.

Startup steps:

Turn on DC switch and press the POWER switch, firstly Master LED will light up once, and then the BMS Status LED will light up for 0.5s, Operating Status LED will light up for 1s at the same time, it means that the system works normally.
